THE PUBLIC SERVICE COMMISSION  
OF SOUTH CAROLINA  
DOCKET NO. 2017-370-E**

IN RE: Joint Application and Petition of South	)	
Carolina Electric & Gas Company and	)	
Dominion Energy, Inc. for review and	)	
approval of a proposed business	)	<b>TRANSCONTINENTAL GAS PIPE</b>
combination between Dominion	)	<b>LINE COMPANY, LLC'S</b>
Corporation and Dominion Energy, Inc.,	)	<b>PROPOSED LANGUAGE FOR USE</b>
as may be required, and for a prudency	)	<b>IN FINAL ORDER</b>
determination regarding the abandonment	)	
of the V.C. Summer Units 2 & 3 Project	)	
and associated customer benefits and cost	)	
recovery plan	)	

In lieu of a proposed Order, Transcontinental Gas Pipe Line Company, LLC's submits the following proposed language for use in the Commission's Final Order.

Upon closing of the merger between SCANA Corporation and Dominion Energy, SCE&G shall not contract with an interstate pipe line for natural gas transmission capacity of 100,000 dekatherms per day (dt/d) or more unless or until it has issued a request for proposals to obtain such capacity and considers the proposals in good faith. SCE&G shall file confidential reports on any such solicitation process with the Commission as well as any other state agency as may be required by law within thirty (30) days of the conclusion of such solicitation process. For the avoidance of doubt, SCE&G shall be considered to be contracting for 100,000 dt/d if such contracting takes the form of one or more separate contracts, even if such contracts contain different material terms, if such contracts arise out of the same interstate pipe line project or the same capacity posting.

Upon closing of the merger between SCANA Corporation and Dominion Energy, SCE&G shall not contract with an interstate pipe line for additional natural gas transmission capacity of 100,000 dekatherms per day (dt/d) or more unless the interstate pipe line is the least cost provider of such capacity or unless the Commission has approved the contract for such additional capacity. For the avoidance of doubt, SCE&G shall be considered to be contracting for 100,000 dt/d if such contracting takes the form of one or more separate contracts, even if such contracts contain different material terms, if such contracts arise out of the same interstate pipe line project or the same capacity posting.
